Struga, Republic of Macedonia

Dear Netcetera Hiring Team,

I'm excited to apply for the Machine Learning Intern position at Netcetera. I have just completed my third year of studying Software Engineering and Information Systems at the Faculty of Computer Science and Engineering in Skopje, and I'm eager to apply what I've learned in a practical, real-world setting.

With a GPA of 9.62 and two academic honors, I've always been committed to pushing myself academically. Over the past year, I've focused heavily on machine learning, both through coursework and personal projects. One of my most rewarding projects was a stock market analysis web app, where I used LSTM and Transformer models to forecast trends in the Macedonian exchange. In another project, I applied deep learning and computer vision techniques with TensorFlow and OpenCV to detect objects and lanes in traffic footage.

These projects helped me build solid experience in Python, data preprocessing and model development and gave me a deeper understanding of key ML frameworks. I'm particularly drawn to Netcetera's innovative approach and collaborative culture, and I'm enthusiastic about the opportunity to contribute to meaningful projects while learning from experienced professionals.

Thanks for considering my application. I'd be happy to discuss how I can support your team and am available for an interview at your convenience.

Warm regards,

Ilija Buncheski
